

On November 16th we began renovating the interior of our building to repair extensive water damage sustained earlier this year. That water damage also extended to a portion of our archival collection, which is being restored by experts with the support and advice of the Polish National Archives.

Our sincere thanks go out to all members who have financially supported our building restoration efforts by making an extra pledge this year. More financial support is needed, and any additional donations from members to support the renovations will hasten our completion of this work, enhance our ability to serve the PIASA family, and be recognized, by donor name, on our website. Please contact Bozena Leven, Executive Director, at piasany@verizon.net with your ideas about helping us to secure this additional funding.
